Webpack / Gulp      Good

Git / GitHub / Bitbucket      Good

## Soft Skills

Team Player

Using Design Patterns

Clear friendly communication

Fast Learning

Mentoring

Debugging / Code review

## Languages

English      Intermediate

I am a **Frontend JavaScript Developer** with **10+ years** of experience in **remote fulltime** Full-Stack development including the last 6 years of JavaScript and React development.

I am familiar with **the Agile** environment, **self-organized** and **team-oriented**. My **communication** is clear and friendly and I **prove myself** as completely as it is possible.

I have experience in **quick learning** new tools and technologies and **mentoring** Junior and Middle developers. My passion is building complex **user- and developer-friendly** web applications with edge to edge technology. I believe that today's world needs **thoroughly tested** IT products and the TDD are the best leverages in this way.

I am interested in a **long-term fulltime job** with a distributed **team** of remote developers. My goal is to **do my best** and to get a decent reward for it.

## Projects

2017-02  
2020-09

### Remote Senior JavaScript Developer

Remote fulltime job in a distributed team of **IBM**, IT company, New York, Moscow

**React, Redux, Typescript, Node.js, Nest.js, CI/CD, Docker, REST API**

- Designed and developed production frontends for 4 new projects of the company
- I Implemented a common library and style guide for the React components and types
- I was a mentor of 2 Middle frontend developers and they provided stable results of their work after 2 months

2016-09  
2017-01

### Remote Front-End Software Engineer

Remote fulltime job in a distributed team of **Virgin Voyages**, Plantation, Florida, United States

**React, Redux, Flow, WebSocket, Webpack, CI/CD, Docker, REST API**

- I developed a 3D engine of a navigation system via React
- I developed a complex module for **real-time** visualization of **Big Data**
- Configured **continuously deployment** with Jenkins and **Docker**

2014-09  
2016-08

### Full Stack Software Engineer

Contract Remote work for the WIX, Websites Interactive Constructor

**HTML5, CSS3, Perl, MySQL, JavaScript**

- **I was in a team** of 3 remote Full Stack Developers
- I supported designer modules, wrote Unit tests.
